

NEW S2 ZIP ANCHOR TO SECURE LANDSCAPING FABRICS

To complement our comprehensive range of tree anchoring systems, Platipus has developed the simple, cost-effective and reliable S2 Zip Anchor to secure a wide variety of landscaping fabrics.

- Ideal for weed control, ground covers and grass reinforcement
- Reliable alternative to traditional pins or pegs meaning less anchors maybe required to cover the same area
- Reduces time and labour costs associated with reinstalling loose pins
- Easy to assemble and quick to install using simple tools
- Self-locking load plate holds material securely to the ground
- UV stabilised and highly corrosion resistant
- Excellent surface erosion solution when used with a suitable geotextile

The most popular method for supporting rootballed, airpot and container grown trees up to 12m in height.

Ideal for securing trees in shallow soil, on roof gardens or planting areas restricted by buried services.

Innovative system that delivers water and air evenly around the rootball directly targeting the root zone.

S2 Zip Anchor - a more reliable solution for weed control, ground cover and grass reinforcement.

PDEA®, ARGS® and ARVS® are Registered Trademarks of Platipus Anchors.

Platipus Anchors technology is protected by International Patents, Trademarks and Registered Copyright.
